

CTC

1500 Series Light Duty

PRODUCT NAME

1500 Series Light Duty Pillow Block Bearing

Purpose of Product

This product is designed to support a rotating shaft with the help of compatible bearings and mounting hardware. It is commonly used in light-duty industrial and mechanical applications where shaft alignment and smooth rotation are required.

Key Features

- Compact and lightweight housing design
- Easy installation with pre-drilled mounting holes
- Corrosion-resistant coated metal body
- Integrated bearing support for smooth rotation
- Suitable for low to moderate load applications
- Maintenance-friendly (often grease-lubricated)

Detailed Specifications (*typical for 1500 series — may vary by manufacturer*)

- **Housing Material:** Cast iron or cast steel
- **Bearing Type:** Mounted ball bearing
- **Series:** 1500 (Light Duty)
- **Mounting Type:** Pillow block (base mount with two bolt holes)
- **Shaft Compatibility:** Typically, small to medium shaft diameters (e.g., ~12 mm to 40 mm range depending on variant)
- **Lubrication:** Grease fitting (manual lubrication)
- **Operating Temperature Range:** Approx. -20°C to 100°C
- **Seal Type:** Single or double lip seals (varies)
- **Load Capacity:** Light-duty applications
- **Finish:** Painted or coated for corrosion resistance
