

FC 200/300 Series

PRODUCT NAME

FC 200/300 Series Round Flange Bearing Unit (4-Bolt Flange Bearing)

Purpose of Product

This unit is designed to **support a rotating shaft on flat surfaces or machine walls**. Its round flange design allows it to be securely mounted, making it ideal for applications where the shaft passes through a surface and needs stable, aligned support.

Key Features

- **4-bolt round flange design** for strong and even load distribution
- **Pre-assembled housing and insert bearing** for easy installation
- **Self-aligning insert bearing** accommodates minor shaft misalignment
- **Heavy-duty cast housing** for durability and vibration resistance
- **Grease fitting** for convenient relubrication
- **Set screw or eccentric locking collar options** for shaft fixation
- **Protective coating** for corrosion resistance
- **Compact and robust design** suitable for various industrial uses

Detailed Specifications (*typical for FC 200/300 Series — may vary by exact model*)

- **Bearing Type:** Insert ball bearing
- **Housing Type:** Round flange (4-bolt)
- **Housing Material:** Cast iron / ductile iron
- **Bearing Material:** High-carbon chromium steel
- **Number of Mounting Holes:** 4
- **Shaft Diameter Range:** Typically 12 mm to 75 mm (model dependent)
- **Mounting Configuration:** Face-mounted (through surface)
- **Lubrication:** Grease lubricated with relubrication fitting
- **Sealing:** Double-lip seals for dust and contaminant protection
- **Operating Temperature Range:** Approx. -20°C to +120°C
- **Locking Mechanism:** Set screws or eccentric collar (variant dependent)
- **Applications:** Conveyors, agricultural machinery, fans, and light-to-medium industrial equipment
