

P 200/300 Series

PRODUCT NAME

P 200/300 Series Pillow Block Bearing (Plummer Block Housing)

Purpose of Product

This product is used to support a rotating shaft with the help of a mounted bearing. It provides stable shaft alignment, reduces friction, and allows smooth rotational motion in mechanical systems such as conveyors, machinery, and industrial equipment.

Key Features

- Robust cast housing for durability and load support
- Pre-drilled mounting holes for easy installation
- Designed to accommodate insert bearings with set screw or locking collar
- Good resistance to wear and moderate environmental conditions
- Easy maintenance and replacement of bearing inserts
- Suitable for both light and medium-duty applications

Detailed Specifications

- **Series:** P 200 / P 300
- **Material:** Cast iron (commonly), sometimes ductile iron for higher strength
- **Mounting Type:** Two-bolt base mounting
- **Bearing Compatibility:** Fits UC series insert bearings (varies by size)
- **Shaft Diameter Range:** Typically from ~12 mm up to ~100 mm (depends on exact model)
- **Housing Finish:** Anti-corrosion coated or painted
- **Lubrication:** Grease nipple provided for re-lubrication
- **Operating Temperature:** Generally -20°C to +120°C (depending on bearing used)
- **Seal Type:** Rubber seals or metal shields (based on insert bearing)
- **Applications:** Conveyors, agricultural machinery, fans, pumps, and general industrial equipment
