

PA 200/300 Series

PRODUCT NAME

PA 200/300 Series Pillow Block Bearing Unit

Purpose of Product

This product is used to support a rotating shaft while allowing smooth motion and alignment. It is commonly mounted on a base or frame and is widely used in machinery such as conveyors, agricultural equipment, and industrial systems where reliable shaft support is required.

Key Features

- Rugged housing designed for durability and load support
- Self-aligning bearing to accommodate minor misalignment
- Pre-lubricated for reduced maintenance needs
- Easy installation with standard mounting configuration
- Sealed design to protect against dust and contaminants
- Typically includes a grease nipple for relubrication

Detailed Specifications *(may vary slightly by exact model in the series)*

- **Series:** PA 200 / PA 300
- **Housing Material:** Cast iron or ductile iron
- **Bearing Type:** Insert ball bearing (self-aligning)
- **Shaft Diameter Range:** Typically ~20 mm to 60 mm (varies by model)
- **Mounting Type:** Two-bolt base mount
- **Sealing:** Rubber seals or metal shields

- **Lubrication:** Grease lubricated, with relubrication fitting
- **Operating Temperature Range:** Approx. -20°C to +120°C
- **Load Capacity:** Depends on bearing size within the series
- **Finish/Coating:** Corrosion-resistant painted housing (often green)
