

CTC

SD 500/600 Series Heavy Duty

PRODUCT NAME

SD 500 / 600 Series Heavy Duty Bearing Housing

(Also known as **SD-type Split Plummer Block Housing – Extra Heavy Duty Series**)

Purpose of Product

The **SD 500/600 series housing** is designed to:

- Support **large rotating shafts** in demanding industrial environments
- Accommodate **very heavy radial and axial loads**
- Provide **maximum protection and rigidity** for bearings
- Ensure **long service life under shock loads and vibration**

It is primarily used where standard SN housings are not sufficient, such as:

- Mining and quarry equipment
- Cement and steel plants
- Crushers, conveyors, and heavy-duty fans

Key Features

- **Extra heavy-duty construction** with reinforced ribs
- **Split housing design** (base + cap) for easy maintenance
- Suitable for **large spherical roller bearings**
- High load-carrying capacity (significantly higher than SN series)
- Excellent resistance to **shock loads and vibration**
- Multiple **advanced sealing arrangements**:
 - Labyrinth seals
 - Taconite seals (for dusty environments)
- Provision for **oil or grease lubrication systems**
- Integrated **lifting eye bolt** for easy handling
- High structural rigidity for **continuous heavy-duty operation**

Detailed Specifications

General Technical Specifications

- **Series:** SD 500 / SD 600
- **Housing Type:** Split Plummer block (extra heavy-duty)
- **Material:**
 - High-grade cast iron (standard)
 - Optional: Ductile iron / cast steel for extreme conditions
- **Bearing Compatibility:**
 - Primarily **spherical roller bearings (222, 230, 231, 232 series)**
 - Adapter sleeve mounting supported
- **Shaft Diameter Range:**
 - Typically **60 mm to 400+ mm** (varies by model)
- **Mounting Type:**
 - Foot-mounted with heavy-duty bolt holes
