

CTC

SN 500 Series Medium Duty

PRODUCT NAME

SN 500 Series Medium Duty Pillow Block Housing

Purpose of Product

This product is used to support rotating shafts by housing bearings securely in place. It is designed for **medium-duty industrial applications**, offering stability, alignment, and protection for bearings in machinery such as conveyors, fans, and processing equipment.

Key Features

- Robust **split housing design** (easy installation & maintenance)
- Suitable for **medium load applications**
- High-strength **cast iron construction**
- Provision for **lubrication (grease fitting)**
- Compatible with **spherical roller bearings**
- Good **dust and contamination protection** with seals
- Replaceable bearing without removing the shaft
- Strong base with **elongated mounting holes**

Detailed Specifications (*typical for SN 500 series — varies by size*)

- **Housing Material:** Cast iron (often FG200 / equivalent)
- **Type:** Split Plummer block / pillow block housing
- **Series:** SN 500 (Medium Duty)
- **Bearing Compatibility:** Spherical roller bearings (e.g., 222xx series)
- **Shaft Diameter Range:** Approx. 20 mm to 140 mm (depends on model size)
- **Mounting:** Base-mounted with two elongated bolt slots
- **Lubrication:** Grease nipple provision
- **Sealing Options:** Felt seals, labyrinth seals, or rubber seals
- **Operating Temperature:** -20°C to 120°C (depending on grease)
- **Load Capacity:** Medium-duty industrial loads
- **Finish:** Painted / coated for corrosion resistance
